

Practical 1

AIM: Introduction to Android, Introduction to Android Studio IDE, Application Fundamentals: Creating a Project, Android Components, Activities, Services, Content Providers, Broadcast Receivers, Interface overview, Creating Android Virtual device, USB debugging mode, Android Application Overview. Simple "Hello World" program.

Solution:

Open Android studio and Create new project.

MainActivity.java

```
package com.example.firstpractical_t2083;

import android.support.v7.app.AppCompatActivity;
import android.os.Bundle;

public class MainActivity extends AppCompatActivity {
    // Swapnil Ramgire T.20.83
    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
    }
}
```

activity_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<android.support.constraint.ConstraintLayout
    xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">

    <TextView
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:text="Hello World!"
        app:layout_constraintBottom_toBottomOf="parent"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toTopOf="parent" />

</android.support.constraint.ConstraintLayout>
```

Starting emulator.

1. Click on device manager.

2. Click on Create device

Click finish then run the application.

OUTPUT

Practical 2

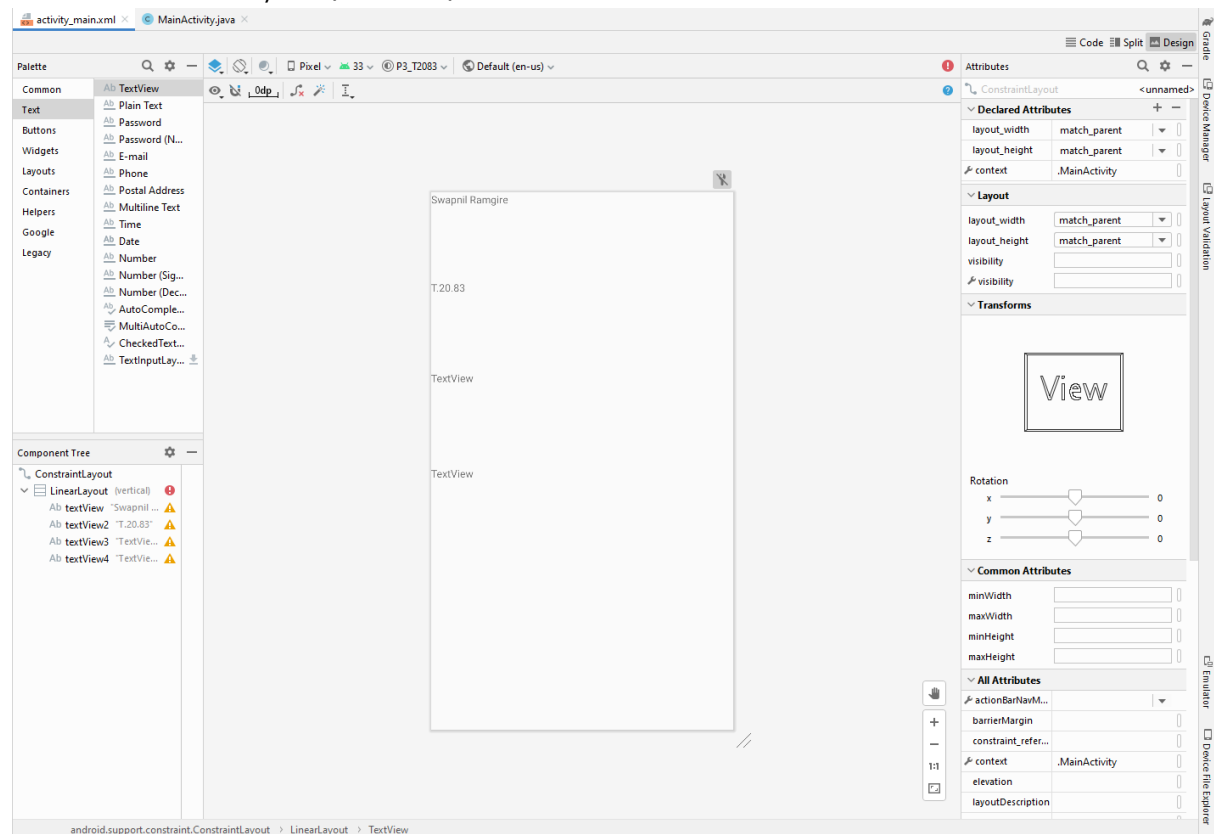

AIM: Programming Resources

Android Resources: (Color, Theme, String, Drawable, Dimension, Image)

Solution:

Create one project with empty activity

Add one LinearLayout(Vertical) and 4-5 TextView

Adding Colors:

Go to, Project -> res -> values -> colours.xml

Add these lines.

```
<color name="blue">#0000FF</color>
<color name="green">#00FF00</color>
<color name="yellow">#FFFF00</color>
<color name="orange">#FF7F00</color>
```

Now Open activity_main.xml

Add:

android:background

Complete Code

```
<?xml version="1.0" encoding="utf-8"?>
<android.support.constraint.ConstraintLayout
    xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
```

```

        tools:context=".MainActivity">
<!--      Swapnil Ramgire T.20.83-->
<LinearLayout
    android:layout_width="409dp"
    android:layout_height="729dp"
    android:orientation="vertical"
    tools:layout_editor_absoluteX="1dp"
    tools:layout_editor_absoluteY="1dp">

    <TextView
        android:id="@+id/textView"
        android:layout_width="match_parent"
        android:layout_height="120dp"
        android:text="Swapnil Ramgire"
        android:background="@color/blue"/>

    <TextView
        android:id="@+id/textView2"
        android:layout_width="match_parent"
        android:layout_height="123dp"
        android:text="T.20.83"
        android:background="@color/green" />

    <TextView
        android:id="@+id/textView3"
        android:layout_width="match_parent"
        android:layout_height="130dp"
        android:text="TextView"
        android:background="@color/yellow" />

    <TextView
        android:id="@+id/textView4"
        android:layout_width="match_parent"
        android:layout_height="131dp"
        android:text="TextView"
        android:background="@color/orange" />
    </LinearLayout>
</android.support.constraint.ConstraintLayout>

```

OUTPUT:

String

Go to, Project -> res -> values -> strings.xml

And Add these lines:

```
<resources>
    <string name="app_name">P3_T2083</string>
    <string name="studentName">Swapnil Ramgire</string>
    <string name="studentRollNumber">T.20.83</string>
    <string name="string3">Test String 1</string>
    <string name="string4">Test String 2</string>
</resources>
```

Now, go to activity_main.xml and add below line of code to every TextView

android:text=

Complete code:

```
<?xml version="1.0" encoding="utf-8"?>
<android.support.constraint.ConstraintLayout
xmlns:android="http://schemas.android.com/apk/res/android"
xmlns:app="http://schemas.android.com/apk/res-auto"
xmlns:tools="http://schemas.android.com/tools"
android:layout_width="match_parent"
android:layout_height="match_parent"
tools:context=".MainActivity">
    <!-- Swapnil Ramgire T.20.83-->
    <LinearLayout
        android:layout_width="409dp"
        android:layout_height="729dp"
        android:orientation="vertical"
        tools:layout_editor_absoluteX="1dp"
        tools:layout_editor_absoluteY="1dp">

        <TextView
            android:id="@+id/textView"
            android:layout_width="match_parent"
            android:layout_height="120dp"
            android:text="@string/studentName"
            android:background="@color/blue"/>

        <TextView
            android:id="@+id/textView2"
            android:layout_width="match_parent"
            android:layout_height="123dp"
            android:text="@string/studentRollNumber"
            android:background="@color/green" />

        <TextView
            android:id="@+id/textView3"
            android:layout_width="match_parent"
            android:layout_height="130dp"
            android:text="@string/string3"
            android:background="@color/yellow" />

        <TextView
            android:id="@+id/textView4"
            android:layout_width="match_parent"
            android:layout_height="131dp"
            android:text="@string/string4"
            android:background="@color/orange" />
```

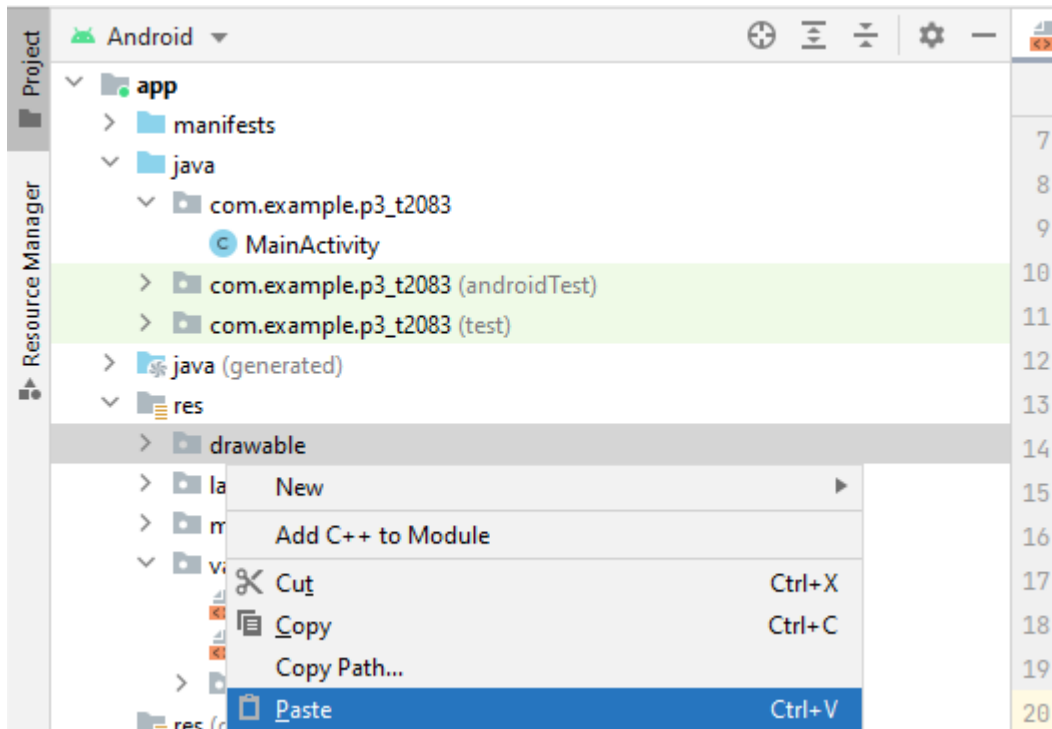

```
</LinearLayout>  
</android.support.constraint.ConstraintLayout>
```

OUTPUT:

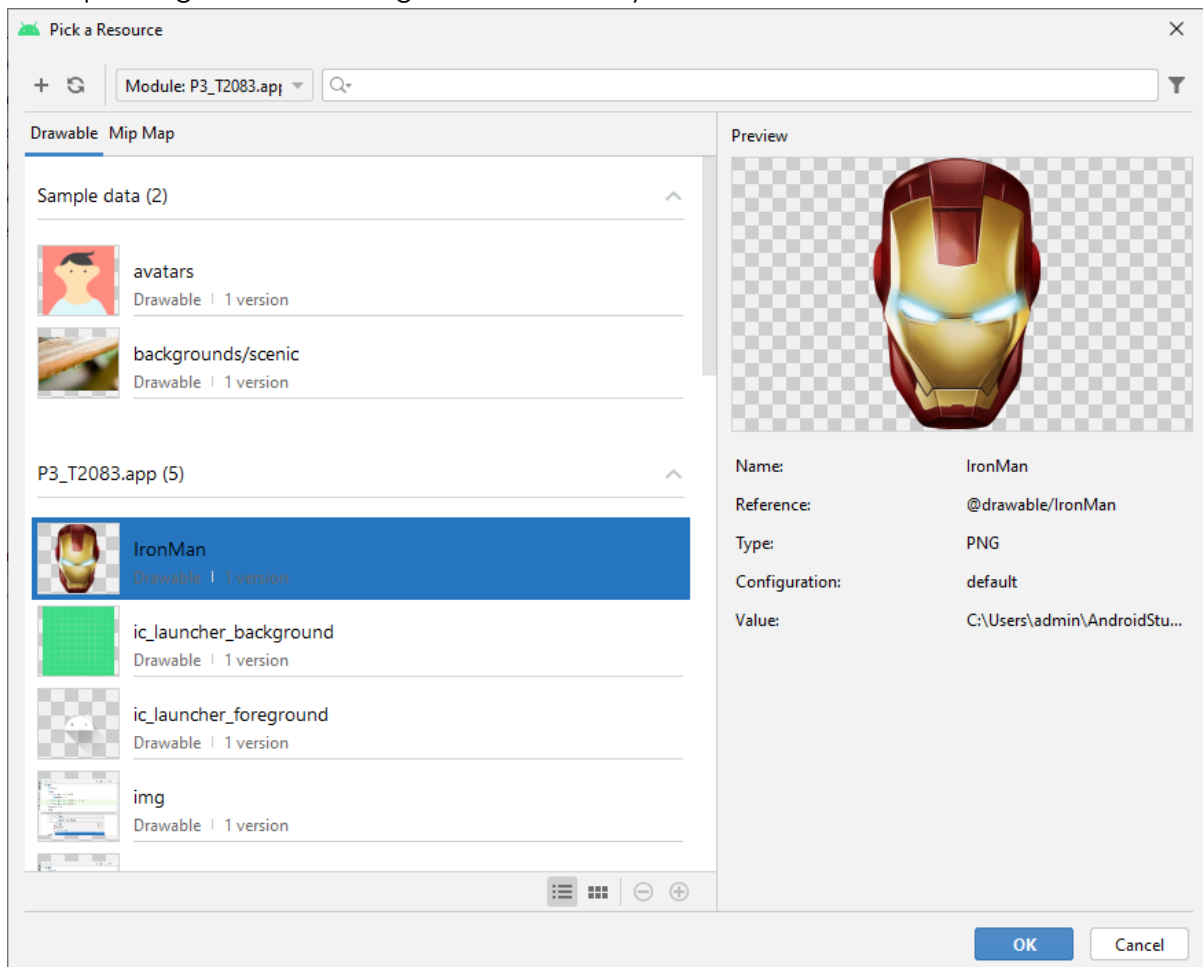

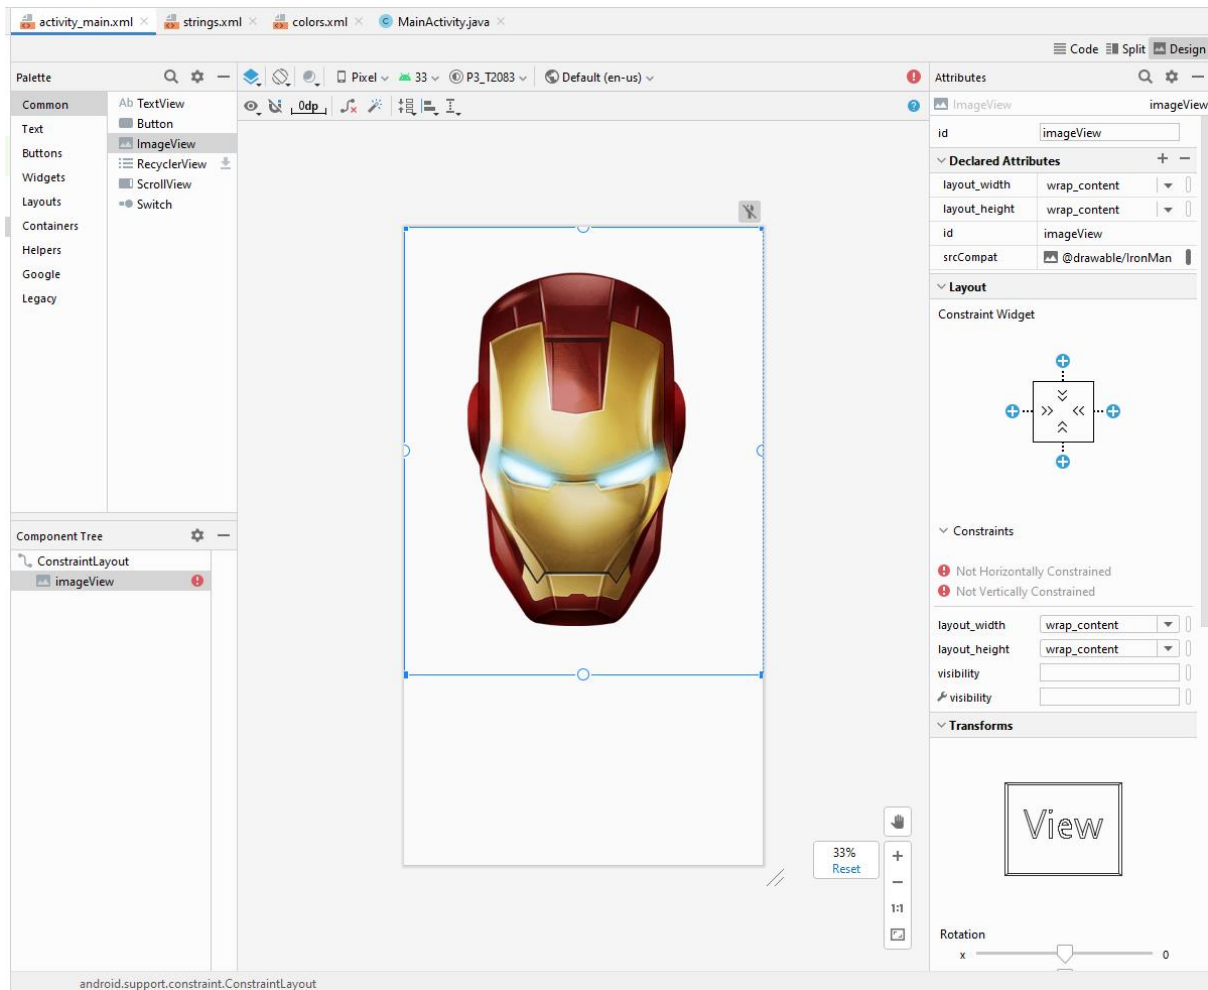

Images:

Download and image and paste it in the Project -> res ->Drawable

After pasting, add one ImageView in activity_main.xml

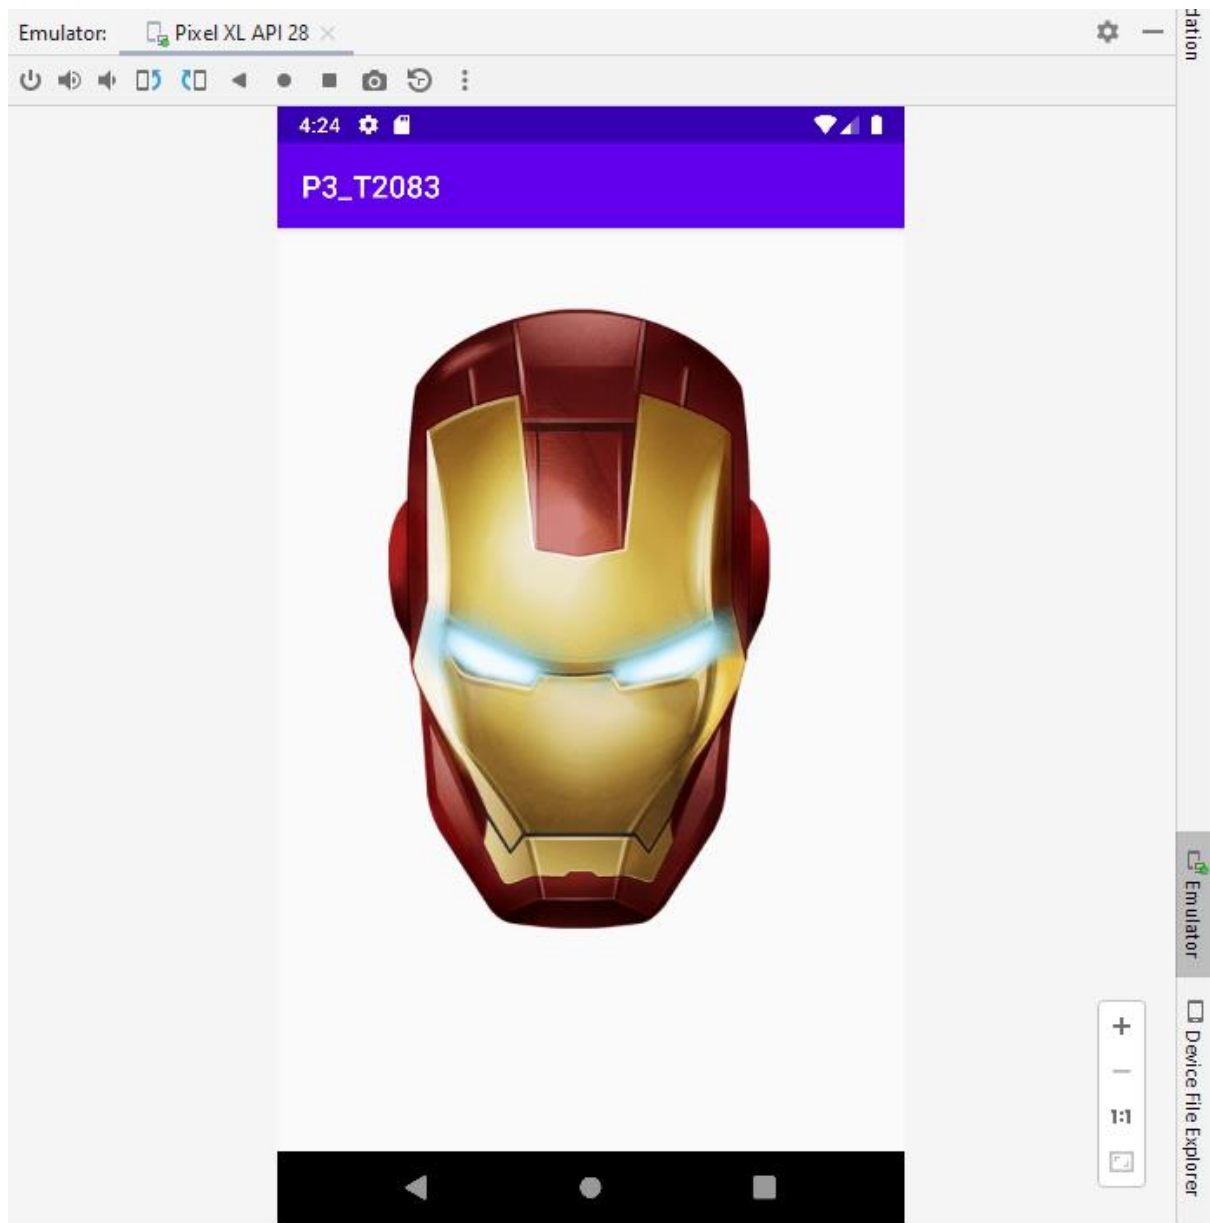

Complete code of activity_main.xml

```
<?xml version="1.0" encoding="utf-8" ?>
<android.support.constraint.ConstraintLayout
    xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">
    <!-- Swapnil Ramgire T.20.83-->

    <ImageView
        android:id="@+id/imageView"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        app:srcCompat="@drawable/IronMan"
        tools:layout_editor_absoluteX="116dp"
        tools:layout_editor_absoluteY="214dp" />
</android.support.constraint.ConstraintLayout>
```

AIM: Programming menus, dialog, dialog fragments

Solution:

A) Menus

Create New project, then right click on res folder and add Android Resource File.

Then write below code in menus.xml

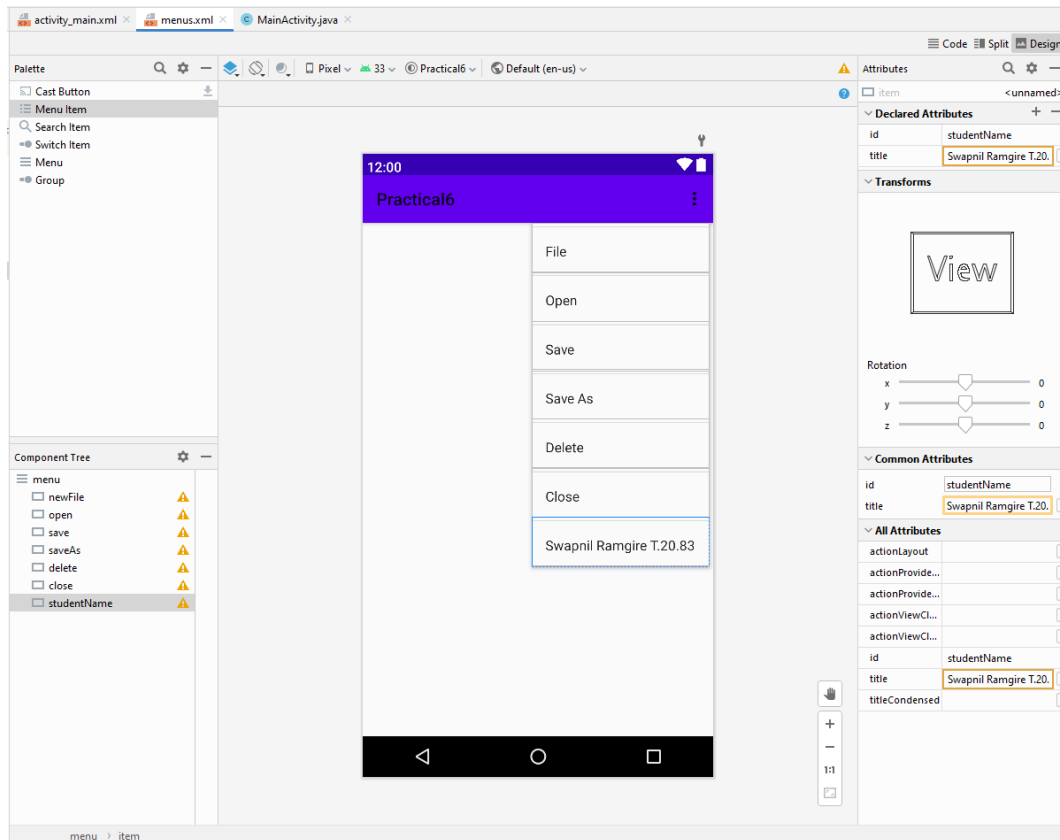

```
<?xml version="1.0" encoding="utf-8"?>
<menu xmlns:app="http://schemas.android.com/apk/res-auto"
      xmlns:android="http://schemas.android.com/apk/res/android">
    <item android:id="@+id/newFile" android:title="File" />
    <item android:id="@+id/open" android:title="Open" />
    <item android:id="@+id/save" android:title="Save" />
    <item android:id="@+id/saveAs" android:title="Save As" />
    <item android:id="@+id/delete" android:title="Delete" />
</menu>
```

```

<item
    android:id="@+id/close"
    android:title="Close" />
<item
    android:id="@+id/studentName"
    android:title="Swapnil Ramgire T.20.83" />
</menu>

```

Design View

ActivityMain.java

```

package com.example.practical6;

import android.support.v7.app.AppCompatActivity;
import android.os.Bundle;
import android.view.*;
import android.widget.Toast;

public class MainActivity extends AppCompatActivity {
    // Swapnil ramgire T.20.83
    public boolean onCreateOptionsMenu(Menu menu){
        MenuInflater a = getMenuInflater();
        a.inflate(R.menu.menus, menu);
        return true;
    }
    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);

    }
}
```

OUTPUT

B) Broadcast receivers

Create new project then, right click on Project -> java -. Com.example.<project name>

And add new class

Code:

AirplaneModeChangeReceiver.java

```
package com.example.practical8b;
import android.content.BroadcastReceiver;
import android.content.Context;
import android.content.Intent;
import android.provider.Settings;
import android.widget.Toast;
```

```
public class AirplaneModeChangeReceiver extends BroadcastReceiver {
    public void onReceive(Context context, Intent intent){
        if (isAirplaneModeOn(context.getApplicationContext())){
            Toast.makeText(context, "Airplane mode is on (T.20.83)",
                Toast.LENGTH_SHORT).show();
        } else {
            Toast.makeText(context, "Airplane mode is off (Swapnil
                Ramgire)", Toast.LENGTH_SHORT).show();
        }
    }
    private static boolean isAirplaneModeOn(Context context){
        return Settings.System.getInt(context.getContentResolver(),
            Settings.Global.AIRPLANE_MODE_ON, 0) != 0;
    }
}
```

MainActivity.java

```
package com.example.practical8b;

import android.content.Intent;
import android.content.IntentFilter;
import android.support.v7.app.AppCompatActivity;
import android.os.Bundle;

public class MainActivity extends AppCompatActivity {
    AirplaneModeChangeReceiver airplaneModeChangeReceiver = new
    AirplaneModeChangeReceiver();

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
    }
    protected void onStart() {
        super.onStart();
        IntentFilter filter = new
IntentFilter(Intent.ACTION_AIRPLANE_MODE_CHANGED);

            }
        });
    }
}

```

```

    }
    });
    pause.setOnClickListener(new View.OnClickListener() {
        @Override
        public void onClick(View v) {
            ring.pause();
        }
    });
    stop.setOnClickListener(new View.OnClickListener() {
        @Override
        public void onClick(View v) {
            ring.stop();
        }
    });
}
}
}

```

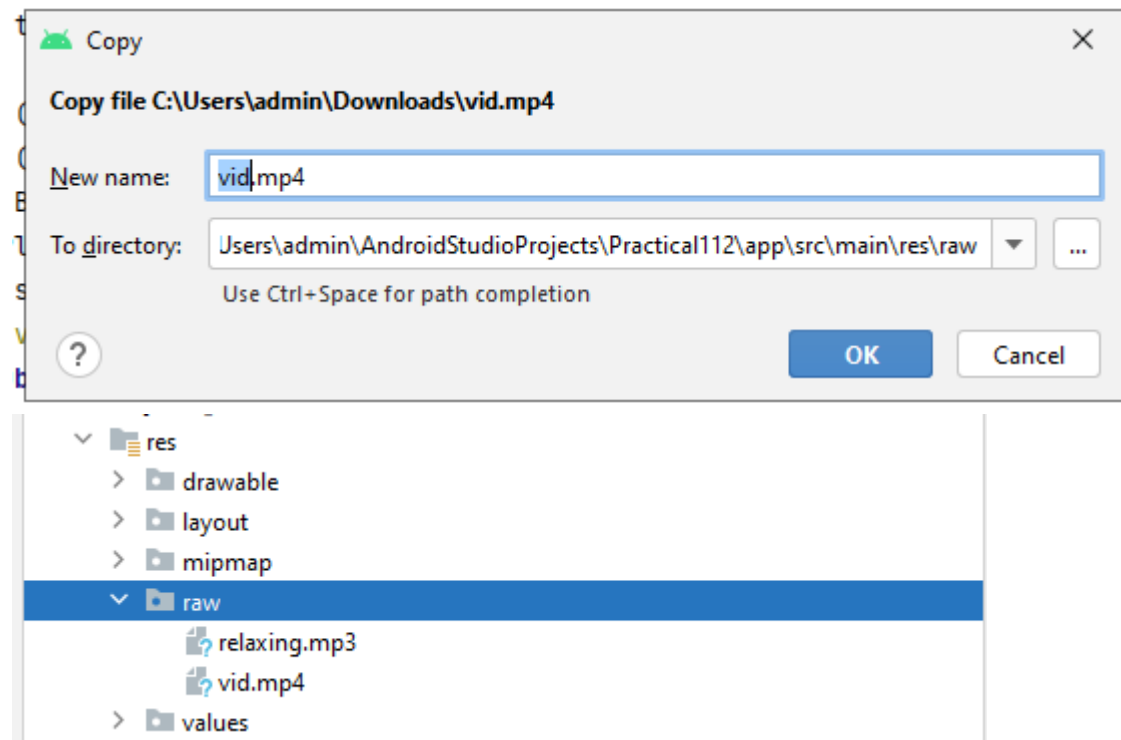

OUTPUT

11.B) Playing video in android

Steps:

Copy paste your video file in this raw folder

MainActivity.java

```
package com.example.practical11;

import android.net.Uri;
import android.support.v7.app.AppCompatActivity;
import android.os.Bundle;

import android.widget.MediaController;
import android.widget.VideoView;

public class MainActivity extends AppCompatActivity {
    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);

        VideoView v=(VideoView) findViewById(R.id.video);

        v.setVideoURI(Uri.parse("android.resource://" + getPackageName() + "/" + R.raw.vi
            d));
        MediaController m=new MediaController(this);
        v.setMediaController(m);
        v.start();
    }
}
```

activity_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<android.support.constraint.ConstraintLayout
xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">

    <LinearLayout
        android:layout_width="match_parent"
        android:layout_height="match_parent"
        android:orientation="vertical">

        <VideoView
            android:id="@+id/video"
            android:layout_width="match_parent"
            android:layout_height="wrap_content" />

        <TextView
            android:id="@+id/textView5"
            android:layout_width="match_parent"
            android:layout_height="wrap_content"
            android:text="Swapnil Ramgire T.20.83"
            android:textSize="20dp" />

    </LinearLayout>
</android.support.constraint.ConstraintLayout>
```

OUTPUT
